

advantage 2-piston forged monobloc R-type caliper

Applications

Rally rear
Single seater
Saloon car rear
Hill climb

Key features and benefits

- Radial mounting for maximum rigidity and firm, consistent pedal
- Forged aerospace grade aluminium alloy – high strength with light weight
- Aluminium pistons as standard, stainless steel available as an option
- High temperature seals
- 2Kg Anti-knock back springs
- Hard stainless steel wear plates
- Pad retaining wire for fast pad change
- Uses popular R-type pad shape – wide range of friction materials available
- Common leading/trailing installation by switching bleed screw and inlet

Specifications

- Disc diameter range Ø250 to 300mm
- Disc thickness range 8 to 10mm
- Mounting holes Ø10.2mm at 95x30.5 centres
- Fluid inlet 3/8-24 UNF (-3) male
- Dry weight 0.97kg excluding pads
- Pads 14mm thick, 63.4mm long
- Pad references:

42mm deep 48mm deep
49cm² per caliper 56cm² per caliper
