

Alcon NASCAR pedal box and high efficiency master cylinders

- **Reduced hysteresis.** A rigid low friction seal is used in place of the normal elastomeric lip seal
- **Reduced dead travel at the pedal as the breather port in the master cylinder closes**
- **Full range of bore diameters available: 0.625", 0.70", 0.750", 0.812", 0.875", 0.937", 1.00"**
- **Breather port cut-off can be adjusted by fitting shims**

Removable Linear
Hall Effect Push Rod
travel sensor

Magnet inside
Push Rod

Port for Kulite
pressure sensor

Rotatable Reservoir
feed port

Trunnion and needle
roller bearings for
unrestricted rotation

Removable capsule
for anti-knock off
valve
